HARLAND KELSEY ING.

KELSEY-HOHLANDS NURSERY

EAST BOXFORD MASSACHUSETTS

1885 - 1937

Over half a century of horticultural experience is a record of which we may be justly proud. This is our 53rd consecutive annual catalog. Each year we have offered an improved selection of fine ornamental plants to discriminating garden lovers.

To our old friends — greetings.

To our new friends of 1937 — may you join our long list of steady customers. Our aim will be to serve you.

Our nursery is in better physical condition than ever before. This means real value thru better plants for each buyer. You will find listed here the better common varieties, and rare and unusual plants difficult to obtain elsewhere, including many introductions of the famous Arnold Arboretum.

Visit Kelsey-Highlands Nursery and see for yourself a unique establishment devoted to horticultural research and the production of better plants for better gardens. Use Kelsey's Garden Guidebook as a reference book of what is best for planting in New England. Consult our Landscape Department for help on large or small problems.

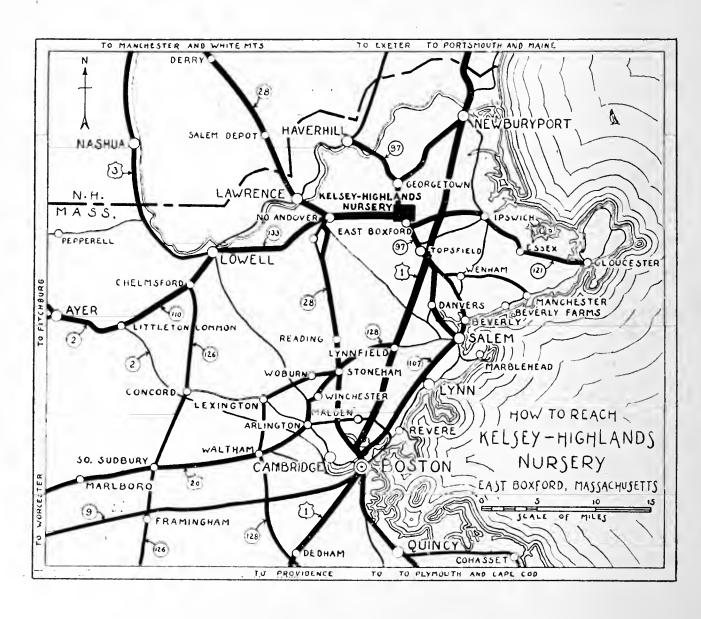

Prices are consistent with the quality of plants offered. Before ordering read carefully the terms and conditions of sale on Page 61.

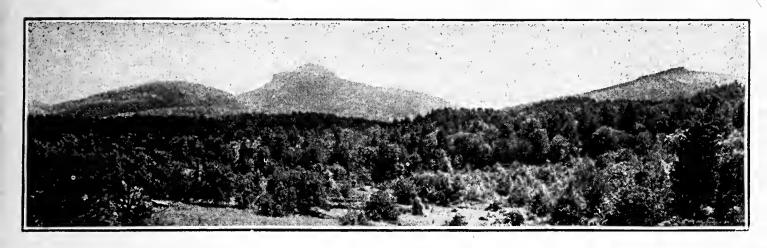

Note:—5 or more plants of one size and kind take the 10 rate.

25 or more plants of one size and kind take the 100 rate.

CONIFEROUS EVERGREENS

The charm of conifers is in their variety of form, their dependability in giving beauty of color every month in the year and in their feeling of strength and ruggedness. In Winter harsh and bleak landscapes are enlivened and given a feeling of warmth by their dark beauty and gentle lines and in Summer they impart a sense of coolness. For formal or informal hedges, screens or windbreaks they are invaluable.

Care must be used in the choice, location and spacing of evergreens, for many, like most of the Hemlocks and the Firs will reach an eventual height of thirty to one hundred feet, while the Yews, some of the Arborvitaes and many of the Junipers are

dwarf or spreading in habit.

More plantings are spoiled through crowding than through planting too sparsely—so allow plenty of room for future growth.

We are glad to give expert advice to customers as to best varieties and proper treatment for each need and use.

NOTE: Figures after the names are approximate heights reached by the trees and shrubs under favorable conditions, first under cultivation, and then in their

native habitat.

5 or more of a size take the 10 rate, 25 or more the 100 rate.

HEMLOCKS

Hemlocks are a specialty at Kelsey-Highlands Nursery. As specimens, in general plantings or for hedges, they are indispensable.

TSUGA, HEMLOCK.

canadensis, CANADA HEMLOCK. 40-100 ft. Handsome for lawn or forest plantings or for hedges. Stands severe clipping. This graceful American conifer stands in the forefront of all ornamentals.

Canada Hemlock

See next page for Carolina Hemlock

A group of Carolina Hemlocks (Tsuga caroliniana) at the Arnold Arboretum

TSUGA, Continued.

caroliniana, CAROLINA HEMLOCK. 30-70 ft. Introduced to cultivation by Harlan P. Kelsey. Prof. Sargent considered this "The handsomest conifer we can grow in New England." Unique in habit, with dark dense tufted foliage on sweeping pendulous branches. It is hardier and more adapted to trying city atmospheres than the Canada Hemlock and seems to thrive in southern latitudes where the latter becomes thin, yellow and unsightly. No garden should be without this glorious evergreen. We have the finest stock of perfect specimens in America. All lift with fine balls due to frequent transplantings. It is unsurpassed as a hedge plant.

BROADLEAF EVERGREENS

Andromedas, Kalmias, Leucothoe, Rhododendrons, etc.

No ornamentals have become more deservedly popular than the Broadleaf Evergreens. Their beauty of flower and foliage promises added possibilities in the landscaping of your grounds.

All of the species that we list—and most of them are natives of the United States-are perfectly hardy as far north as Quebec, if

given proper soil conditions and exposure or location.

Mass plantings of Rhododendrons, Mountainlaurel and Andromedas, with "filler" or "edging" plants, such as Leucothoe, Heather, Rose Daphne and Sandmyrtle, are very desirable and probably show these Broadleaf Evergreens at their best. Such ground covers as Bearberry, Canby Pachistima and Japanese

Pachysandra carpet the shady spaces luxuriantly.

To successfully grow these beautiful Broadleaf Evergreens, see that the soil is peaty, acid and well drained. Use a permanent mulch of Oak or other hardwood leaves (except Maple). A northern exposure is desirable, otherwise overhead leafy shade is essential. Ferns are at home in the Rhododendron bed and edgings of them or of Violets, Dicentras and a host of beautiful low ground covers give variety and beauty. Azaleas and Berrybearing Shrubs may be used freely in the planting with charming effects. We gladly aid customers in making up satisfactory combinations of 'fillers' and other plant material for any proposed Rhododendron or Broadleaf planting. 4.80 ARCTOSTAPHYLOS uvaursi, BEARBERRY. April-July. Most excellent trail-

ing ground cover, thriving equally well in sandy or loamy soils, and forming a dense, low mat of dark green foliage. Pink bell-shaped flowers and scarlet berries.

BUXUS koreana, KOREAN BOX. 2 ft. This dwarf variety has proved hardy in Northern Massachusetts, for low hedges and edging flower beds. 22.00 3-6 in.

Deciduous Trees and Shrubs

The deciduous trees and shrubs listed are varieties that have proved reliable for plantings as far north as northern New England

and most are hardy in southern Canada.

This list includes many lovely rare and unusual trees and shrubs not generally available as well as the best standard varieties. We gladly assist customers in making up lists to ensure a continuous succession of flowers throughout the season, or for Autumn and Winter color effects, or for bird cover and the like.

NOTE: The heights shown after the names are approximate heights reached under favorable conditions, first under cultivation, and then in their native habitat.

AZALEAS

We list only the native and most hardy exotic varieties. These acid-soil loving plants mass well with the broadleaf evergreens and are distinct and beautiful additions to any planting. Though not evergreen they are closely related to the rhododendrons and require similar soil conditions and care.

require similar son conditions and care.

MALUS, THE FLOWERING CRAB

The Flowering Crabs have few rivals among gorgeous Spring flowering trees and shrubs. At the Arnold Arboretum one of the most important events of the year is the blooming of the Crabs, followed by the showy fruit in autumn. Most varieties are of greatest value as feed in winter for Pheasants, Grouse and other birds.

They are of easy culture, and whether planted singly or in masses, give remarkable and quick results. As soon as the ground can be worked in Spring is an ideal time for planting, and again in Fall after foliage is well ripened. Give rich soil and mulch heavily. Use all the water the soil will take in planting.

PRICE OF FLOWERING CRABS	Each	10
18-24 in		16.00
3-4 ft		10.00
4-5 ft		14.00
5-6 ft		20.00
6-7 ft		28.00
7-8 ft	6.00	38.00

The sizes we can supply follow the description of each variety. These prices are for strong plants, well developed for their height. For extra heavy specimens or selected individual plants charge is made to cover increased value.

MALUS, CRAB.

angustifolia plena. 15-30 ft. Double pink, violet-scented flowers in June. Sizes 4-5 ft. and 5-6 ft. arnoldiana, ARNOLD CRAB. 8-15 ft. Large rose-colored flowers turning to white. May. Size 3-4 ft. atrosanguinea, CARMINE CRAB. 15-20 ft. Brilliant carmine flowers. May. Sizes 3-4 ft., 4-5 ft., and 6-7 ft. baccata, SIBERIAN CRAB. 30-45 ft. Pure white blossoms in great profusion. May. Small green or reddish fruit. Sizes 3-4 ft. 4-5 ft. 5 ft.

fusion. May. Small green or reddish fruit. Sizes 3-4 ft., 4-5 ft., 5-6 ft., 6-7 ft., and 7-8 ft.

baccata mandshurica, MANCHURIAN CRAB. 12-15 ft. Early May. From China and Japan; large pure white fragrant flowers, dark scarlet fruit. Sizes 3-4 ft. and 4-5 ft.

Sizes 3-4 ft. and 4-5 ft.
coronaria, WILD SWEET CRAB. 10-30 ft. June. White and pink flowers delightfully fragrant. Sizes 5-6 ft. and 6-7 ft.

DOLGA (Hansen Red Crab) 12-15 ft. May. New, distinctive, with white flowers and brilliant red edible fruit in great profusion. Size 4-5 ft.

ELEY FLOWERING CRAB (Malus purpurea eleyi). May. New, resembling floribunda, but with larger and better colored flowers and a more profuse bloomer. Sizes 3-4 ft. and 4-5 ft.

floribunda, JAPANESE FLOWERING CRAB. 15-30 ft. May. Bright pink flower buds, white flowers. Small yellowish fruit much liked by birds. Sizes 3-4 ft., 4-5 ft., 5-6 ft., 6-7 ft. and 7-8 ft.

floribunda, BOB WHITE. Pure white flowers. Sizes 3-4 ft., 4-5 ft., 5-6 ft., 6-7 ft. and 7-8 ft.

floribunda, SNOWBANK. Profuse white flowers. Sizes 3-4 ft., 4-5 ft., and

floribunda, SNOWBANK. Profuse white flowers. Sizes 3-4 ft., 4-5 ft. and 5-6 ft.

HOPA REDFLOWERING CRAB. 12-15 ft. A remarkable tree which is entirely covered with rose-colored blossoms in May. Fruit is red inside and out. Very hardy. Size 3-4 ft. ioensis plena, BECHTEL CRAB. 12-15 ft. June. Double pink flowers like small clustered roses. Size 4-5 ft. micromalus, MIDGET CRAB. Early May. Handsome small tree. Upright habit, showy pink flowers. Sizes 3-4 ft., 4-5 ft., 5-6 ft., 6-7 ft. and 7-8 ft.

Take 5% discount when cash accompanies order.

Hardy Herbaceous Perennials

In this list will be found a collection of hardy herbaceous perennials that will give a good succession of bloom from early Spring until late Autumn. Nearly all are of easy culture. The usual list of herbaceous perennials offered in American catalogs can be secured and shipped with our stock, so that customers may feel safe in ordering and getting full collections, even if not priced below.

Single plants at one-half the three rate.

Approximate height variety attains is given after the name.

All Prices of Herbaceous Perennials are .75 per 3, \$2.00 per 10, and \$15.00 per 100 'except as otherwise noted. 5 or more of a kind take the 10 rate. 25 or more the 100 rate.

ACHILLEA, PEARL. 1-2 ft. July-October. Pure white in masses for cutting. AJUGA, BUGLE.

genevensis, GENEVA BUGLE. 6 in. May-June. Splendid blue-flowered ground cover.

reptans alba, WHITE CARPET BUGLE. 5-6 in. May-June. A vigorous white flowered variety, carpeting sunny or shady areas.

ALTHAEA rosea, HOLLYHOCK. 5 ft. June-July. Mixed singles and mixed doubles.

ALYSSUM saxatile compactum, DWARF GOLDENTUFT. 9-18 in. Masses of brilliant yellow flowers in early Spring.

ANTHEMIS, PERRY'S VARIETY. 1½-2 ft. June-October. Bright yellow flowers, excellent for cutting. .90 per 3, \$2.40 per 10., \$18 per 100.

AQUILEGIA, COLUMBINE. canadensis, AMERICAN COLUMBINE. 2 ft. April. Shades of red. Fine for naturalizing.

chrysantha, GOLDEN COLUMBINE. 3 ft. June-August. Fragrant golden yellow flowers.
haylodgensis, HAYLODGE COLUMBINE. Blue flowered, long spurs.
MRS. SCOTT ELLIOTT'S long-spurred Hybrids. 2-3 ft. June-July. Large

flowers in various shades of pink.

ARABIS procurrens. 6-12 in. Early Spring. Rare. Delicate white flowers in elongated racemes.

ARENARIA verna caespitosa, MOSS SANDWORT. June-July. Dense moss-like growth with small white flowers on thread-like stems. For rock gardens and between stepping-stones.

ARMERIA—See STATICE.

ARTEMESIA, SILVER KING. July. Silvery white foliage and sprays of mistlike white flowers, fine for cutting.

ASARUM, WILDGINGER.

canadense, CANADA WILDGINGER. 8-12 in. April-May. Heart shaped leaves

and small brownish-purple flowers.
shuttleworthi, MOTTLED WILDGINGER. 6-8 in. May-July. Curiously mottled leaves. Flowers mottled violet within.

ASCLEPIAS tuberosa, BUTTERFLYWEED. 12-24 in. Bright orange flowers in late Summer.

ASTER, ASTER.

alpinus, ROCK ASTER. 6 in. June. Dense low tufted habit. White or lavender flowers.

amellus, ITALIAN ASTER. 18-24 in. August. Purple flowers 1¾ in. across in clustered heads.

dumosus. 2-3 ft. Blue to white flowers 1 inch across in numerous heads.

linariifolius, SAVORY LEAVED ASTER. 12 in. Violet blue. A hardy compact native species.

novaeangliae, NEW ENGLAND ASTER. 3-6 ft. Deep purple flowers in August and September.

novaeangliae roseus, ROSY NEW ENGLAND ASTER. 3-6 ft. August-September. A fine hardy native rose-colored variety.

tataricus, TATARIAN ASTER. 6 ft. October-November. Blue-violet. Latest of all Asters.

NAMED HARDY ASTERS

A fine collection of varieties, tall growing and dwarfs, that give charming effects in the garden. They bloom in New England during September and October.

.75 per 3, \$2.00 per 10, \$15.00 per 100.

except as otherwise noted.

Per 3 10

1.50

4.00

ACME. Pale lavender, 1% in. diameter, 3 ft. high, closely branching.

AUTUMN QUEEN. Lilac, 2 in. diam. 21/2 ft. high, erect.

BURBANK'S CHARMING. ½ in. diam., 4 ft. high. Long, pendant sprays form plumes of soft pink. The very best late aster and defying frost.

1.50 4.00

EFFIE. Medium lavender, 1% in. diam., 3% ft. high, fairly compact habit. Its large yellow center renders it very attractive.

1.50 4.00

FREEDOM. Pale rose, 1½ in. diam., 3½ ft. high.

HEATHER GLOW. Pink, 1½ in. diam., 3 ft. high, rather compact habit.

HON. VICARY GIBBS. Pale lavender, ¾ in. diam., 2½ ft. high, compact habit.

IVY LOGAN. Deep lavender, 14 in. diam., 3½ ft. high.

LADY LLOYD. Pale rose, 11/4 in. diam., 31/2 ft. high, fairly compact habit.

MRS. DAVIS EVANS. Clear lavender, 1½ in. diam., 3 ft. high, erect habit, very floriferous and this characteristic combined with its bright color makes it of excellent horticultural value.

1.50
4.00

PEGGY BALLARD. Large sprays of rosy mauve flowers. 3 ft. high.

PERRY'S PRIDE. Clear pink, 1½ in. diam., 3 ft. high, loosely branching.

PERRY'S WHITE. Pure white petals which change to red with large golden center, 1\(\frac{1}{4}\) in. diam., 3\(\frac{1}{2}\) ft. high, loosely branching.

1.50
4.00

SAINT EGWIN. Pale rose, 1 in. diam., 2½ ft. high, compact. THORA PERRY. Pale lavender, 2 in. diam., 1½ ft. high, compact habit. VENUS. Deep lavender, ½ in. diam., 1½ ft. high, compact habit.

WHITE CLIMAX. Pure white, 4 ft. high.

Hardy Native Collected

RHODODENDRONS - AZALEAS - MOUNTAINLAUREL LEUCOTHOE - ANDROMEDAS FROM THE CAROLINA MOUNTAINS

The high Carolina Mountain district has always been the source of supply for the grand Native Broadleaf Evergreens and Azaleas. Harlan P. Kelsey was the first and for many years the only substantial source for these loveliest of hardy ornamental plants, many of which he introduced to cultivation.

As exclusive Agents for New England for the Farmer's Federation, Inc., Asheville, N. C., a mountain cooperative organization, we offer the highest grade of material sent out from that region, all heavy, fresh dug clumps, carefully balled and burlapped. This super-grade stock is far superior to the usual mixed and light grades of collected stock usually sent out, and yet the prices are very reasonable. Do not be deceived, but buy and plant the best.

Address all orders and inquiries to:-

HARLAN P. KELSEY, Inc.

Kelsey-Highlands Nursery East Boxford, Massachusetts

These prices are for full carlot orders only, and shipment will be made direct from North Carolina to your freight station.

Hardy Native Collected

LOW GROUNDCOVERS AND SHRUBS

Americans are at last realizing how ruthlessly in the past nature has been man-handled and destroyed in the name of progress and profit, and that now it is imperative to again cover with beautiful native growth the waste places, roadsides and woodlands, so as to redeem our incomparable landscapes, prevent soil erosion, and give natural food and protection to our fast disappearing wild bird and animal life.

Nature's delicate equilibrium has been badly upset and should be restored unless floods, drought, insect pests and plant diseases are surely to overwhelm us.

Experts now agree that trees alone will not accomplish this and that the use of native shrubs and permanent low groundcovers in vast quantities is absolutely necessary.

Therefore for this purpose we are offering below a selected list of economical material in strong plants, clumps and sods. We are always glad to advise with customers on this important subject so they may secure the most satisfactory results.

(Turn to next page for listing.)

LOW GROUNDCOVERS	Per 10 Per 100
ACORUS calamus, SWEETFLAG. Hardy herb for marshy white flower spadix to 4 inches.	places. Greenish-
Strong plants BAPTISIA tinctoria, YELLOW WILD-INDIGO. 12-24 in. (flowers in June. For the dry field or hillside. Strong plants	Golden pea-shaped

SOME OF THE BETTER BERRY BEARING PLANTS

"WHAT shall I plant to attract the birds?" is a question this list answers. These plants will produce a succession of fruit, varying in color, size and time of fruiting, from midsummer until late winter, attracting to your home grounds birds of many kinds. Nearly all of them flower in the Spring, adding still more beauty to the landscape. For time of fruiting consult general list.

LISTS OF PLANTS FOR SPECIAL ENVIRONMENTS

PLANTS SUITABLE FOR ROCK GARDENS

EVERY Rock Garden has problems of its own. No list of this nature can in any way be complete—it can merely suggest a few of the varieties that are being successfully used in the finest American Rock Gardens. Herbaceous perennials are not included, as use of the various kinds depends on the type and size of the rock garden. We will gladly make recommendations of perennials to use for given types of rock garden.

Aesculus discolor mollis Amelanchier stolonifera Arctostaphylos uvaursi Azalea pentaphylla Azalea poukhanensis Berberis, Truehedge Barberry Buxus koreana Calluna, in variety Cotoneaster horizontalis Cydonia japonica pygmaea Daphne cneorum Daphne mezereum Dicentra eximia Epigaea repens Erica carnea Euonymus radicans Forsythia ovata Fothergilla gardeni Hypericum bucklei Juniperus chinensis sargenti Juniperus communis depressa Juniperus horizintalis plumosa Juniperus sabina Juniperus sabina tamariscifolia Juniperus squamata meyeri

Leiophyllum buxifolium prostratum Pachistima canbyi Picea, Dwarf Alberta Spruce Pieris floribunda Pieris japonica Pinus montana mughus Potentilla tridentata Rhododendron catawbiense compacta Rhododendron laetivirens Rhododendron mucronulatum Rosa rouletti Taxus canadensis Taxus cuspidata Taxus cuspidata (upright form) Taxus cuspidata nana Taxus media hicksi Thuja, American Pyramidal Arborvitae Thuja occidentalis compacta Thuja occidentalis ellwangeriana Thuja occidentalis globosa Thuja occidentalis hoveyi Tsuga canadensis gracilis Tsuga canadensis pendula Vaccinium pennsylvanicum Viburnum opulus nanum Yucca filamentosa

PLANTS FOR MOIST SOILS

MOST plants will not stand a location that is quite moist a great deal of the time. These varieties, however, do not seem to mind considerable moisture if proper drainage is provided. In many cases it increases their growth and gives them finer foliage.

Care must be used in choosing varieties that will best suit your particular location and we are prepared to help you plan correctly.

Acer rubrum
Alnus rugosa
Aronia arbutifolia
Azalea nudiflora
Calapogon pulchellus
Calycanthus floridus
Chelone lyoni

Viburnum dentatum

BOG AND WATER PLANTS

Bog gardening is a most interesting phase of horticulture. Most of these plants will also thrive in moist upland soil.

Andromeda glaucophylla Azalea viscosa Benzoin aestivale Caltha palustrus Chamaedaphne calyculata Chelone glabra
Cypripedium spectabile
Eupatorium purpureum
Habenaria, in variety
Iris versicolor
Kalmia polifolia

Ledum groenlandicum Lobelia cardinalis Lythrum salicaria roseum Rhodora canadensis Thalictrum polygamum

PLANTS FOR DRY SOILS

OFTEN it is extremely difficult to find plants that will thrive in soil that is quite dry. These plants are among the best for such situations and when established seem to enjoy well-drained and rather dry soil.

Arctostaphylos uvaursi
Betula populifolia
Calluna, in variety
Hypericum densiflorum
Juniperus, in variety
Lespedeza bicolor
Phellodendron, in variety
Pinus montana

Pinus montana mughus Pinus pungens Pinus resinosa Pinus strobus Pinus sylvestris Prunus maritima Prunus pumila Robinia hispida Robinia kelseyi Rosa setigera Symphoricarpos racemosus Symphoricarpos vulgaris Vaccinium pennsylvanicum Yucca filamentosa

PLANTS USEFUL FOR HEDGES AND WINDBREAKS

THERE are many plants not usually considered in this respect that can be used for hedge and windbreak purposes. This list gives only those varieties that are easily adaptable through pruning to such uses. To help you plan and plant your hedge we will be glad to give detailed information.

Acer ginnala
Berberis, in variety
Carpinus, in variety
Chamaecyparis obtusa
Cotoneaster acutifolia
Cotoneaster lucida
Cotoneaster nitens
Crataegus, all varieties
Euonymus radicans vegetus
Fagus, in variety
Forsythia, all varieties
Ligustrum, all varieties

Lonicera fragrantissima Lonicera tatarica alba Picea canadensis Pinus montana Pinus montana mughus Pinus strobus Rhamnus, in variety Rosa hugonis Rosa rugosa Rosa rugosa alba Rosa rugosa hybrids Rosa setigera Rosa spinosissima

Salix pentandra
Spiraea vanhouttei
Syringa, in variety
Taxus cuspidata (upright
form)
Taxus cuspidata nana
Thuja, in variety
Tsuga canadensis
Tsuga caroliniana
Ulmus pumila
Vaccinium corymbosum
Viburnum dentatum

PLANTS-FOR SHADY PLACES

THE following plants do well in a shady or semi-shady location. Most of them will also thrive in sunny locations. For woods plantings and for those shady spots where even grass does not seem happy you will find these items very useful. Good rich peaty soils are always desirable.

Acer pennsylvanicum Ajuga genevensis Akebia quinata Amelanchier, in variety Aquilegia canadensis Artostaphylos uvaursi Asarum shuttleworthi Aronia, in variety Azalea, in variety Celastrus scandens Chelone glabra Cimicifuga americana Cimicifuga racemosa Clethra, in variety Clintonia borealis Convallaria majalis Cornus, in variety Corylus americana

Cypripedium, in variety Daphne mezereum Diervilla trifida Epigaea repens Ferns, in variety Forsythia suspensa Galax aphylla Gaylussacia baccata Hamamelis, in variety Hydrangea, in variety llex glabra Ilex verticillata Kalmia, in variety Leucothoe catesbaei Leucothoe racemosa Ligustrum, in variety Lobelia cardinalis Mitchella repens

Orchids, in variety Ostrya virginiana Pachysandra terminalis Rhododendron, in variety Rhus glabra Rubus odoratus Shortia galacifolia Symphoricarpos racemosu Symphoricarpos vulgaris Taxus, in variety Thuja occidentalis Trillium, in variety Tsuga canadensis Tsuga carolinianum Vaccinum, in variety Viburnum, in variety Vinca minor Vinca minor alba Zanthorhiza apiifolia

PLANTS FOR SEASHORE CONDITIONS

IN PLANTING nursery stock near the shore it is advisable to select plants that will withstand the attacks of ocean winds and salt spray. Only comparatively resistant kinds are listed here. Many others will do well with slight protection.

Acer rubrum Actinidia arguta Amelanchier, in variety Arctostaphylos uvaursi Aristolochia sipho Berberis, in variety Betula, in variety Calluna, in variety Celastrus orbiculatus punctatus Malus, in variety Clethra, in variety Cornus, shrub forms Cotoneaster, in variety Crataegus, in variety Cytisus supinus Erica carnea Forsythia, in variety Hydrangea, in variety Hydrangea petiolaris Ilex glabra Juniperus chinensis pfitzeriana

Juniperus communis depressa Juniperus horizontalis plumosa Juniperus virginiana Larix, in variety Ligustrum, in variety Lonicera japonica halliana Lonicera morrowi Lonicera sempervirens Lonicera tatarica, in variety Myrica carolinensis Picea asperata Picea canadensis Picea engelmanni Picea jezoensis Picae pungens Picea pungens glauca Picea pungens kosteri Pinus densiflora Pinus montana Pinus montana mughus

Pinus nigra Pinus resinosa Populus, in variety Prunus, in variety Rhamnus, in variety Rhus, in variety Rhododendron laetivire Rosa, in variety Salix, in variety Sorbus, in variety Spiraea, in variety Taxus cuspidata Taxus cuspidata nana Ulmus americana Ulmus pumila Vaccinium, in variety Viburnum, in variety Viburnum carlesi Wisteria sinensis Wisteria sinensis alba Yucca filamentosa

PLANTS FOR AUTUMN COLORING

THE plants in this list are especially valuable for the great variety of colors of foliage in Autumn.

Acer ginnala Acer palmatum Acer rubrum Acer saccharum Amelanchier laevis Arctostaphylos avaursi Aronia, in variety Azalea arborescens Azalea vaseyi Ampelopsis, in variety Berberis, in variety Betula papyrifera Calluna vulgaris cuprea

Clethra alnifolia Cornus alternifolia Cornus florida Cornus paniculata Crataegus coccinioides Crataegus cordata Enkianthus campanulatus Euonymus alatus Euonymus radicans carrierei Euonymus radicans colorata Gaylussacia baccata

Leucothoe catesbaei Nemopanthus mucronatus Nyssa sylvatica Oxydendrum arboreum Potentilla tridentata Quercus palustris Rhododendron dahuricum Rhododendron mucronula-Rhus copallina Rhus glabra Vaccinium corymbosum Viburnum, in variety

KELSEY'S HORTICULTURAL AND LANDSCAPE SERVICE

Customers of Harlan P. Kelsey, Inc. will find our various branches of service of real value thruout the year. Some special features of this service are described below.

- 1. RENOVATION OF GARDENS AND PLANTATIONS. Overgrown or run down gardens can often be improved immeasurably by readjustment, pruning, fertilization, the addition of a few plants, etc. Let us help you make your garden more interesting and enjoyable.
- 2. LANDSCAPE SERVICE. Harlan P. Kelsey, Inc. offers a skilled service devoted to the creation of finer landscapes. After a careful study of each individual problem we recommend a development which will fit the particular location so as to combine beauty and convenience with economy of construction and maintenance. Our background of sound designing and horticultural experience assures such results. No charge is ordinarily made for a preliminary conference at our office, or on the grounds where most effective results are obtained. If considerable time or distance is involved a minimum charge is made to cover costs.
- 3. HEDGES, WINDBREAKS AND SCREENS. The growing of fine material for evergreen and deciduous hedges, windbreaks and screens is a specialty at Kelsey-Highlands Nursery. For protection from harsh winds, for masking unsightly views and to insure privacy the larger screens are often invaluable. Lower hedges and borders are pleasing essentials in many garden designs. We will gladly submit recommendations and quotations for individual problems. A far wider list is available for these uses than is generally supposed.
- 4. COLLECTED NATIVE PLANTS. Roadsides, woodlands, banks, borders and the like are delightfully and permanently improved by a free use of our choice and beautiful native plants and flowers, Our list of hardy American bulbs, ferns, herbaceous perennials and low ground-cover shrubs is extensive. Most of these can be supplied in strong cut "sods" or as individual clumps or plants. We supply any quantity and will gladly make up special carload prices when desired. See pages 53-55 for further information.
- 5. PLANTINGS FOR BIRDS. Birds add beauty and song to the garden, and are of greatest value in curbing insect damage. Every garden should include plants that provide natural bird food and cover. We know what these plants are and will gladly help you plan their proper use. Birds are a constant joy and entertainment in the garden—a bird-feeding station in a corner of your garden dedicated to bird life will be a continuing delight.
- 6. RARE AND UNUSUAL PLANTS. For half a century Kelsey-Highlands Nursery has been noted for its rare and new plants. Among the introductions of Harlan P. Kelsey have been some of America's choicest ornamentals. These include Carolina Hemlock, Pinkshell Azalea, Korean Chrysanthemum and the Kelsey Korean Hybrids, Galax, Grays Lily, Carolina Rhododendron, White Carolina Rhododendron, Kelsey Catawba Rhododendron, Mountain Silverbell, Kelsey Locust and others. We grow many of the choicest introductions of the Arnold Arboretum, the U. S. Department of Agriculture, etc.

MOVING LARGE SPECIMEN TREES. Our tree moving-equipment is especially designed for safely transplanting large Evergreens or Shade Trees up to almost 1 foot in diameter. We have many handsome specimens of Pine, Hemlock, Spruce, Fir and Shade Trees in wide variety from 10 to 30 feet in height. These are moved with large balls with little disturbance to the root systems, largely eliminating risks. See illustration above.

TERMS AND CONDITIONS OF SALE

NOMENCLATURE. Standardized Plant Names is authority for names used in this catalog.

PRICES in this catalog cancel all previous lists and are subject to change without notice. Prices are at nursery, or f.o.b., East Boxford, Mass. Station, or loaded for truck delivery, and include all packing charges. except where special methods are requested or bulky or unusual shaped plants are involved.

GRADE. We supply a standard grade of stock, but when unusual specimen material is selected an extra charge will be made to fit the value.

SHIPPING INSTRUCTIONS. State whether by Freight, Express, Truck or Parcel Post and exact destination. Otherwise we use our best judgment, but assume no responsibility thereby. We deliver by truck all over New England and nearby States at reasonable rates.

PLANT INSURANCE. We assume no risk after delivery to Transportation Agency in good condition. As we have no control of plant material after it leaves our hands, we do not guarantee its life nor replace without charge. Where plantings are done by us we will insure plants for a given period at reasonable rates to fit the risk involved.

LARGE TREES will be transported by Tree Machine or heavy truck at reasonable cost, depending on size and distance of delivery.

Cash with order, entitling you to 5% discount; or satisfactory reference from unknown customers. To established credit accounts we allow 30 days from date of invoice, charging 6% for accounts overdue. 5 at 10 rate, 25 at 100 rate.

CLAIMS for errors must be made on receipt of goods. Any mistake or

fault on our part will gladly be rectified.

KELSEY'S SPECIAL LAWN GRASS SEED

In our horticultural and landscape service, we consider dependable grass seed a most important item. The mixtures we offer below contain the finest grade of seed in proper proportions. Our formulas are the fruit of experience and study of soil conditions and lawn needs of Northeastern United States. Best results come from early Spring sowing and again in August and September.

Kelsey's SUPERLAWN Mixture.

A noteworthy mixture of finest perennial turf grasses and domestic rye-grass. Only seeds of high and tested quality are used, This formula is particularly designed for the neutral to acid soil almost universally found in the North Atlantic States. Sow one pound to 400 sq. feet.

1 lb......\$.50 5 lbs......\$2.35 10 lbs......\$4.50 25 lbs......\$10.00

Kelsey's BENTLAWN Mixture.

This is a superb bent mixture which will produce a fine firm turf of unusual appeal. The Astoria Bent is carefully blended with other fine grasses so as to combine the elegance of a Bent lawn with the dependability of the less "fussy grasses". Sow one pound to 300 sq. feet.

1 lb......\$1.00 5 lbs......\$4.75 10 lbs......\$9.00 25 lbs......\$20.00

Kelsey's SHADYLAWN Mixture.

The shady spot in your garden requires a grass seed mixture especially designed for shade tolerance. Such a mixture is Kelsey's SHADYLAWN, a dependable blend of proven value. Sow one pound to 300 sq. feet.

1 lb......\$.75 5 lbs......\$3.55 10 lbs......\$6.75 25 lbs......\$15.00

Kelsey's SHORELAWN Mixture.

Kelsey's SHORELAWN Grass Seed is a skillful blend of fine grasses from a formula of proven success on many North and South Shore estates, where acid and usually sandy soil, extreme exposure and salt spray are the rule. Sow one pound to 300 sq. feet.

1 lb...... \$.75 5 lbs. \$3.55 10 lbs. ... \$6.75 25 lbs. \$15.00

On orders for Kelsey's Special Lawn Grass Seed Mixtures carriage is paid to any point in New England when cash accompanies order.
